

eRegistry Registration Packet New Organizations

The *My Life My Choices* eRegistry provides a platform to ensure health care preferences and end-of-life wishes are electronically available to all clinicians across the state. This eRegistry provides organizations a solution to not only meet the advance care planning requirements under the new Physician Orders for Scope of Treatment (POST) legislation, but also an organization's broader advance care planning needs. The goal of this technology is to **help health care professionals honor an individual's goals of care across all points of care**. The eRegistry allows your staff to not only **securely store and retrieve advance care planning documents**, including advance directives, but also allows your team to:

- Electronically complete and submit ePOST forms. By utilizing **ePOST**, **clinicians avoid discordant choices** and ensure patient wishes are clear and consistent.
- Engage in structured conversations with patients with a serious illness, supported by an **evidence-based conversation guide** to help clearly identify goals of care.
- Access documents in **real-time so patients' medical preferences** can be honored by health care professionals.

The eRegistry allows for the availability of advance care planning documents across health care systems and health care providers throughout South Carolina. It can **serve as a single source of truth for care preferences** by allowing clinicians to **engage their seriously ill patients in shared-decision making**, and **access the patients advance care planning documents, including POST, at the point of care** no matter where the form was developed. **Registered users will have access** to all advance care planning documents throughout the state via a web-portal at no cost. Integration into an electric medical record system is available at an additional cost to the organization.

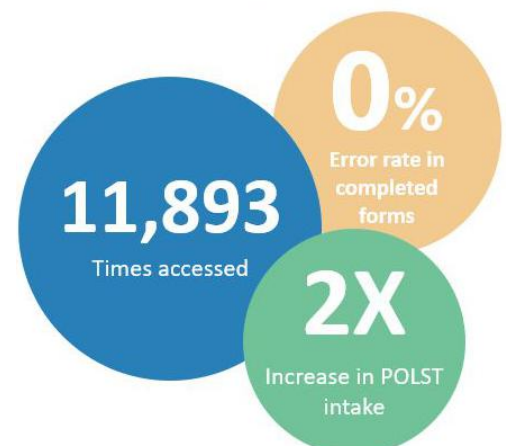

Standardized ePOLST Across Health Care System

Case Study: Oregon Health and Science University

- 528 Beds and 30,188 hospital admission)
- eRegistry Implementation
 - **Back-loaded 9,848 POLST** forms upon launch
 - **Trained clinical staff** and instituted standard processes
 - **Integrated** within EHR clinical workflow

Please complete the organization profile and administrator information below and email it support@mylifemychoices.org to schedule an orientation and to gain access to the eRegistry. The organization administrator will receive training and technical assistance from our support team to oversee registration of each user within the organization. The
